

Lowell J. Robertson, MD, is an admitted Science geek and was chosen to attend Nasa's Advanced Space Camp for Educators and underwent their zero gravity training, was named mission commander and landed the simulated space shuttle.

Dr. Robertson's work with the addiction recovery community has been extensive. He trains other leaders in the community and serves as Oklahoma's Opiate Education Trainer for Celebrate Recovery and is a Representative for the South-Central United States in that organization.

Dr. Robertson was OSU's first addiction medicine fellow and an assistant clinical professor for OSU.

Dr. Robertson is currently the director of detoxification, co-occurring disorders, inpatient and outpatient services at Grand Addiction Recovery Center in Tulsa—The largest mental health and addiction treatment center in this part of the US.

Dr. Robertson also works with doctors that are struggling with addiction issues and serves as the Eastern Oklahoma Director of the Oklahoma Health Professionals Program.
